Abstract (en)

[origin: EP0310125A2] A silver halide color photographic material comprising a support having thereon at least one silver halide emulsion layer, wherein the silver halide color photographic material contains at least one silver halide emulsion containing silver iodide whose average iodide content is at least 7 mol % and at least one compound capable of releasing a bleach accelerating agent upon a reaction with an oxidation product of an aromatic primary amine type color developing agent. The silver halide color photographic material has excellent desilvering property and good graininess.
