Abstract (en)
A connector has a housing (10) having a cavity (11) for storing a pin (100) to be connected and a contact (20) for making electrical contact with the pin (100). The contact (20) has a body portion (22) extending outside the cavity and a bent distal end portion (21) deformably extending through an opening (12) of said cavity from outside the cavity.
