Abstract (en)

[origin: EP0310517A1] The technical sector of the invention is that of the bases or bottoms of cases for large-calibre ammunition possessing an electric ignitor. The base (5) according to the invention is produced from an electrically non-conductive material and comprises at least one metal insert (8) having a thickness of less than 2 mm, each insert possessing at least one contact zone flush with the level of a surface of the base. The invention is used in the sector of armaments. <IMAGE>
