Abstract (en)

[origin: EP0310804A2] In a method for removing an incorrectly introduced weft yarn on an air-jet loom, the incorrectly introduced weft yarn is not severed from the weft yarn supplied, after which predetermined length portions calculated to be smaller than double the weft-yarn length are released from the supplied weft yarn and are shot in a pulse-like manner through the shed which in the meantime has been restored and which exposes the incorrectly introduced weft yarn. <IMAGE>
