Abstract (en)

[origin: EP0311516A1] Connection piece formed by a base element (1) and a cover (2); the bottom (8) of the base element (1) has a through hole (5) fitted with a sealing ring (7) and the closed inner end of the cover (2) has a projecting element or stud (10) designed to enter said through hole (5) and seal this through hole off. The invention relates to improved breathing masks having a mask connection piece formed by a base element and a cover, by which the quality of air breathed may be determined. <IMAGE>
