Abstract (en)

[origin: WO8807367A2] The invention relates to the use of melatonin or related active chemical compounds for the production of pharmaceutical compositions for the treatment of psychogenic stress or acute anxiety as well as for the enhancement of immune resistance in a host against viral and parasitical infections.

Abstract (fr)

Utilisation de la mélatonine ou des composés chimiques actifs apparentés pour la préparation de compositions pharmaceutiques destinées au traitement du stress ou de l'anxiété aiguë ainsi que pour le renforcement de la résistance immunitaire aux infections virales et parasitaires.
