Abstract (en)
[origin: EP0312278A2] A detergent composition in the form of a solid, shaped article suitable for application as a pretreatment of spots or stains prior to laundering, and having a composition which is not substantially harder than toilet soap, is characterised by the incorporation of a bleach which is preferably an inorganic peroxygen bleach. Extrudable and castable compositions are disclosed. Incorporation of a hygroscopic, hydratable salt is very strongly preferred.
