Abstract (en)

[origin: EP0312775A1] The invention relates to a tool arranged with a blade and a handle (2), in particular a screwdriver, having compartments (3), provided at the upper handle end, for screwing inserts (4) or the like, which compartments (3) can be closed by a common cap (9), and proposes, in order to obtain a design which is simple to manufacture and easy to handle, that the cap (9) be held in a snap-on connection and be freely rotatable in the connected position about its centrally located snap- on connection axis. <IMAGE>
