Abstract (en)

[origin: EP0313083A2] A silver halide color photographic material exhibiting excellent color reproduction, processing dependence, sharpness at high speed, and image storage properties having at least one red-sensitive silver halide emulsion layer containing at least one cyan coupler containing naphthol and having a substituent group in the 5-position, at least one green-sensitive silver halide emulsion containing at least one magenta coupler containing-pyrazoloazole and having an alkoxy group or an aryl oxy group in the 6-position, and at least one blue-sensitive silver halide emulsion layer containing at least one yellow coupler, wherein the cyan and the magenta coupler are of a defined formula.
