Abstract (en)

[origin: EP0313103A1] An electric cooking plate (2) with a cooking plate body (1) consisting of cast iron has in its unheated central zone (14) a temperature-protected switch gear (19) which is pressed, by projections (51) on a cover sheet (17), in defined contact with the lower surface (50) of the cooking plate body (1) in the region of the unheated central zone (14). The housing (23) of the temperature-protected switch gear (19) has three projections (8) which rest on this surface (50). In this connection, no covering of the unheated central zone (14) separate from the cover sheet (17a) is provided. The housing (23) has a recess which is open on one side and not closed by a lid. <IMAGE>
