Abstract (en)  
[origin: EP0313548A2] An astrological watch for displaying personal fortunes in dependence on the stars has a display dial 4 for the stars and a memory in which the position of the stars over an extended period is stored. The display dial 4 can be adjusted to the position of the stars both at a predeterminable time and for a predeterminable degree of latitude. A personal cosmogram 8 is arranged within the display dial 4. The display dial 4 itself is arranged within a rotatable minute ring 2 of a chronometer which can be moved past a read-out point 5 by means of a timing mechanism.
