Abstract (en)

[origin: EP0313672A1] The edge rail for a glass pane (3) having at least two profiled rail pieces (37, 39) which fit around the pane edge (1) and are interconnected by means of clamping screws (41) running transversely with respect to the pane surface, having at least one mounting part (9, 27) which is releasably fastened to at least one of the profiled rail pieces (37) and having two cover strips (59) which cover the clamping-rail sections (5, 7) and the distance between these on both sides of the glass pane (3) and are releasably fastened to the clamping-rail sections (5, 7), in which the cover strips (59) and the profiled rail pieces (37, 39) have on mutually facing sides locking profiles (63, 65, 67, 71) which extend in the longitudinal direction of the edge and which hold, supported in a positive manner against one another, the cover strips (59) on the profiled rail pieces (37, 39), and in which the locking profiles of the cover strips (59) are designed as ribs (63, 65) which run at a distance from each of the two longitudinal edges of the cover strip (59) and project relative to the profiled rail piece (37, 39). <IMAGE>
