Abstract (en)
[origin: EP0313734A1] The invention relates to a wall-mounted urinal made of sanitary ceramic which has a moulded-in basin (8a) possessing a peripheral rim, to which the flushing water is supplied in the upper rim region, and which is provided with an outlet connection-piece (8c) at its lowest point. In order to permit simply installation, the urinal comprises, on the one hand, an upper part (8), which forms the basin (8a) with rim (8b) and outlet connection-piece (8c) and is fixed directly to the wall (1), and, on the other hand, a lower part (12) which, after installation of the upper part (8) and also of the water-supply connection and the outlet, can preferably be fixed to the upper part (8) and is designed as an all-round cover for all parts belonging both to the water-supply connection and to the outlet. <IMAGE>
