Abstract (en)

[origin: JPH01147155A] PURPOSE: To automatically connect a cable leading to a central processor while inserting an injector by forming a through aperture which has a plug connecting portion in a flange of a jet housing. CONSTITUTION: In a flange 3 of a jet housing 2 for fixing a jet in the cylinder head, a through aperture 8 which is essentially parallel to the jet axle and through which the ends of connector leads 10, 11 pass. And, an oval cylindrical plug element 14 is inserted to the through aperture 8 from above. A mutual connector 15 is arranged in the plug 14, and ends of the electrical connector leads 10, 11 are electrically connected to the lower end of the mutual connector 15. The top of the plug element 14 is leaded to a valve cover 20 and further is connected to a connecting cable 25 through connecting plug 23. By this manner, the maintenance becomes easier even in a bad circumstance condition and a reliable connection can be ensured.
