Abstract (en)

[origin: WO8902946A1] The thread guide box (1)) of a flat-bed knitting machine is slidingly mounted on a sliding rail (2) extending along the needle beds. The box is driven in both directions of motion of the lock carriage, together with the latter, by a driving pin (4) arranged on the lock carriage. To ensure uniform, constant braking of the thread guide box (1), at least one permanent magnet (6) is mounted on the latter in the region of the sliding rail (2) and has a fixed air gap (7) for the magnetically conducting sliding rail (2).
