Abstract (en)

[origin: EP0315706A1] In order to improve the handling ability of a plastic container (20), especially for coffee creamer, which has a bottom (22), through which the container (20) can be filled, and a lid (24), into which an opening (30) can be introduced for pouring out a liquid, gripping surfaces (38, 39) are to be formed as indentations in a circumferential surface (40) of the container, the edges (42, 43, 44), which bound the gripping surfaces (38, 39) in relation to the circumferential surface of the container (20), merging constantly and without corners into one another. <IMAGE>
