Abstract (en)
[origin: EP0315728A1] A tile cutting device comprises an elongate bearing plate (10), having two trestles arranged at its lengthwise ends for retaining at least one guide bar, at a distance from the bearing plate (10) and aligned parallel thereto, on which a cutting tool is displaceable in the longitudinal direction of the bar and is guided to be adjustable substantially perpendicularly to the surface of the plate, and a try- square (48) having two legs aligned at right angles to each other which is adjustably guided on a rotating disc (54) which is mounted on the surface (20) of the plate to be rotatable about an axis (57) perpendicular thereto. <IMAGE>
