Abstract (en)
[origin: EP0316227A1] The invention relates to the receptacle (30) for collecting the coins in a machine actuated by the insertion of coins. The receptacle (30) comprises at least one removable partition (36) which is locked by means of a pivoting member (50). The latter is controlled by a shutter (42) which makes it possible, in the opening position, to make the collection of the coins contained in the receptacle. <IMAGE>
