Abstract (en)

[origin: WO8807341A1] Drawer with two inclined non-superimposed levels for the storage of pharmaceutical products and adapted to sliding systems. It is comprised of a bottom consisting of two levels (1) and (2) situated in two parallel planes inclined towards one of the edges (9), connected by a medial wall (3), each level being situated on either side of the medial wall. Transparent stops are provided to stop the stored products. The drawer, according to the invention, is particular intended for the storage of pharmaceutical products.
