Abstract (en)

[origin: EP0316553A1] The invention relates to a rotatable support 7 for bottles, which is mounted in the rotatable table 1 of a labelling machine and can be rotated by means of a crank 18 guided in a curved channel 21. For the purpose of a simpler assembly, the support 7 is mounted in a bearing plate 3 which is mounted on the table 1, whereas the crank 18, together with its drive shaft 14 which is coupled to the support, is mounted in the table 1 and can be demounted to the bottom by means of the curved channel 21 which is open at the bottom at a point 22. <??>The single figure is intended for the abstract. <IMAGE>
