Abstract (en)  
[origin: EP0316829A2] The letterbox (10) has a housing (11), in which a number of individual letterboxes (16) are arranged according to a certain arrangement pattern. The housing (11) rests on a base support (12) which has one or two feet (13, 14), depending on the size of the housing (11). The feet (13, 14) have a post with a top plate and a bottom plate. The posts are formed by a basic body in the shape of an open hollow profile and by a side part, which has the same height as the basic body and supplements the basic body to form a closed hollow profile. The closed post can have the shape of a cylinder, a prism, a cuboid or a mixture of these basic shapes. <IMAGE>
