Abstract (en)

[origin: EP0317737A2] The fitting for a corner cupboard, in particular a kitchen corner cupboard has a carousel, containing at least one shelf, having a rotatably mounted rotary column (3) and a two-leaved door (8, 9), which is connected to the rotary column (3) via a fitting linkage, the leaves (8, 9) of which door execute during opening and closing a folding-in or folding-out movement, which is symmetrical in relation to the angle bisector of the door corner, with a superimposed radial retraction end extension movement and are held in the closed position by a spring device (37). Arranged between two parts (26, 28), which execute a movement relative to each other during the door movement, is a movement braking member (40), the braking force of which is directed counter to the closing movement. <IMAGE>
