Abstract (en)
[origin: EP0318045A1] Protective fillet (1) for the application of plaster during connection to a building element (3) of different material, the protective fillet being composed of plastic, having an approximately U-shaped cross-section with a lateral protective tab (4) which can be broken off manually via a notch, and having an adhesive tape (2) for bonding to the building element. The side walls (1a, 1b) of the approximately U-shaped cross-section are internally undercut in design and the protective tab (4) has a distance piece (4a) spanning the thickness of the adhesive tape (2).
