Abstract (en)

[origin: EP0318344A1] The invention relates to an additional fault indicator for a multipole electrical protection device such as a motor circuit-breaker. The additional part is housed under the cover of the protection device. In its casing (21), the lever (60) of a visual fault indicator (23) is coupled to the moving kit (40) of an electrical signalling interrupter (22), openings (36) being provided in the casing (21) and the cover in order to ensure direct visibility of the indicator (23). <IMAGE>
