Abstract (en)  
[origin: EP0318804A2] A multilayer, flexible transfer ribbon with an auxiliary carrier and an adhesive layer, in which a transfer layer containing a binding agent (binder) is situated between the auxiliary carrier and the adhesive layer, the transfer layer adhering more strongly to the adhesive layer than to the auxiliary carrier. The transfer layer containing the binding agent contains a release agent in the form of a soluble cellulose derivative. Incorporation of white pigments into the transfer layer permits the transfer ribbon to be used for the correction of writing or characters. The correction is achieved quickly in a simple manner and leads to the formation of uniform covering with a sharp outline.
