Abstract (en)

[origin: EP0318920A1] Bogie for a rail vehicle, connected to the body of the vehicle by a load-bearing cross-beam (T), and with one or two axles (E) and corresponding motors (M) with transmission through a mechanical differential gear (D) placed in between a motor and the wheels (R1, R2) which it drives. The motor (M) and the differential (D) are suspended from the load-bearing cross-beam (T). <IMAGE>
