Abstract (en)

[origin: EP0319046A2] The magazine has a fold-up lockable bottom for card insertion. It is to be made with a dispensing device for one card at a time, for presentation purposes, but in particular for picking-up and taking- away purposes. To this end, the magazine has a spring band with a pressure plate for the cards to be inserted, against the card ejector which is displaceable on the underside of the cover, for the pushing out of one card at a time at a side slot. <IMAGE>
