Abstract (en)
[origin: EP0319138A1] A coupler (2, 2 min) for two modular plugs includes insulative housing (10, 70, 10, 170) having two plug receiving opening (12, 76; 12 176) for receipt of the modular plugs to be connected. A terminal assembly (120, 220) is included which incorporates a plurality of laterally spaced wire integrally held in a fixed array by a molded over web (140, 240) of insulative material. The coupler housing is two part where the first part (10) includes a rear face (26) having a recessed pocket (32) for the receipt of the web (140, 240) of material. A second housing half (70, 170) is snap latchable to the first housing half (10). The wires are formed into resilient contact portions (128, 134; 228, 234) with the contact portions disposed adjacent to the plug receiving openings (12, 76; 12, 176) for contact with the terminals on the modular plugs.
