Abstract (en)

[origin: EP0319469A1] The inlet (1) has a sleeve (2) which passes through an opening (16) in the flushing-tank body (8). A water pipe is connected to the sleeve (2) by means of a union nut (5). In order to fasten the inlet valve (1), a fastening part (11) is placed on the externally located part (7) of the sleeve (2), which fastening part engages in recesses (6) and bears on the outside of the flushing-tank body (8). The fastening part (11) has an integrally moulded collar (13) which covers the sleeve part (7) at least regionally. <IMAGE>
