Abstract (en)
[origin: EP0319708A2] The coke-quenching vessel of double-walled bottom and side design is provided with a bottom surface (6) inclined towards the outlet opening on the ramp side, the quenching water being supplied through orifices (17, 21) in the bottom surface (3) and the lower regions of the side surfaces (4, 5). It is provided that the coke-quenching vessel (1) can be closed during the quenching process by a cover (7) which has openings (9) to allow the quenching vapours (22) to escape, these openings (9) leading into one or more ducts (11) which lead to a purification device. <IMAGE>
