Abstract (en)
[origin: EP0319808A1] 1. Continuous casting plant for rough strip and consisting substantially of several parallelly arranged casting equipments, chill moulds, strip-guiding and strip-deflecting equipments, furthermore with transverse parting equipments for the subdivision of the strands in the roller bed plane, as well as with downstream reheating or heating furnaces, descaling equipments, roll stands, cooling path and reels, wherein the heating furnace (1) displays several parallelly arranged feeder roller beds in correspondence with the number of cast strands as well as at least one likewise parallel outlet roller bed for conveying the rough strip to the downstream units, characterised thereby, that the heating furnace (1) displays roller bed planes (10, 11, 12) and heating planes (13, 14), wherein the heating planes (13, 14) are displaced vertically relative to the roller bed planes (10, 11, 12) in the heating furnace (1).
