Abstract (en)

[origin: EP0319855A1] Ironing table comprising a board (24) fixed to an underframe (26) of deformable structure which is mounted movably on a vertical wall (12) and which is intended to cause the board (24) to change from a horizontal so-called working position to a practically vertical so-called storage position. According to the invention, the ironing table comprises a motorised device (42) for converting the structure of the underframe, capable of causing the board to change from its working position to its storage position, and vice versa. The invention is used on ironing tables for domestic use which are intended to be mounted in a cupboard. <IMAGE>
