Abstract (en)

The invention relates to a rail construction for supporting recording equipment, such as a movable cart on wheels supporting a camera or the like. The rail construction (1) is built up from coupled profiles (2, 3, 4, 5). On said profiles lies an elongates rollable or fold-up band of rubber or a similar flexible material (17), whereby the band (17) also serves as the bearing surface for the wheels of the cart.
