Abstract (en)
[origin: EP0320219A1] Detergent compositions comprising: (a) from about 1% to about 75% by weight of organic surfactant selected from anionic, nonionic, cationic, ampholytic and zwitterionic surfactants and mixtures thereof, (b) a peroxygen bleach component comprising i) up to about 40% by weight of peroxygen bleaching agent, and/or ii) up to about 25% by weight of a peroxyacid bleach precursor, and (c) from about 0.01% to about 2% by weight of an antioxidant, the antioxidant being incorporated within a solid, amorphous, glass-like carrier material formed of polyvinylpyrrolidone (PVP), the weight ratio of antioxidant:PVP being in the range from about 5:1 to about 1:10. The compositions combine excellent stability, substrate-safety, water-dispersibility, granulometry and detergency performance.
