Abstract (en)

[origin: EP0320432A1] A method of contour milling in which the workpieces 9 are delivered onto a feed table 2 with their side edge 12 at an acute angle  $\alpha$  to the direction of passage 7 and are passed through beneath a copy-milling cutter 5 whose tool axis 8 is orientated at right angles to the side edge 12 of the workpieces 9. This ensures uniform wear without groove formation at the copy-milling cutter 5. <IMAGE>
