Abstract (en)

The plant comprises in combination: a filling station (R) in which said sliver is collected in a first container or vessel (9, 20); a pressing station (P) in which the sliver collected in a second container or vessel (9, 20) is pressed by a press (3), drawn from said container and bound by a binder (50) to form a bump or package; means (33, 64) for drawing the bumps from the pressing station (P) and placing it under a gripping, lifting and transferring device (65) which places said bound material in a carriage (70); and further means (17) for cyclically and mutually exchanging the positions of the container or vessel (9, 20) in the pressing station and of the container or vessel (9, 20) in the pressing station upon completion of a filling phase and of a pressing and binding phase, respectively.
