Abstract (en)

[origin: EP0320781A1] The invention relates to a device for transporting and laying shaped stones or shaped flagstones which are individually removed from a stack and transported to the laying site, with a gripping and lifting system which is arranged height-adjustably on a frame guided on wheels and which is guided height-adjustably via a braking system interacting with a spring element. In contrast to the state of the art, one or more pneumatic springs are provided for height adjustment of the gripping and lifting system (1). <IMAGE>
