Abstract (en)  
[origin: EP0321321A1] Building comprising load-bearing walls (10) made of concrete or the like defining one or more modules with or without floor, characterised in that it also comprises metallic elements forming at least one horizontal frame (12) having an "L"- or upside down "U"-shaped cross-section, of dimensions such that they cover the upper portion of the walls (10) thus providing the binding of the whole assembly of the building. Application to the construction of industrial-type buildings. <IMAGE>
