Abstract (en)

Shearing table (10) for textile surfaces (12) which comprises a work platform (11) on which such textile surfaces (12) are positioned, the work platform (11) having advantageously a rectangular geometric shape, on which table (10) is comprised a headstock (17) which shears the textile surfaces (12) and can slide on a support (15) secured to the shearing table (10) in a position parallel to the longer side of the table (10), the support (15) extending along the whole length of the longer side and being positioned above the work platform (11) of the table (10) substantially in correspondence with the outer edge of the work platform (11), the table (10) comprising also a gripper assembly (23) cooperating with the textile surfaces (12) in a position parallel to the longer side of the shearing table (10), the gripper assembly (23) being suitable to move the textile surfaces (12) on the work platform (11) in a direction at a right angle to the direction of the sliding of the shearing headstock (17) on the support (15).
