Abstract (en)

[origin: EP0322511A1] The invention relates to a date indicator for a watch, having an annular display scale 3 showing the days of the month. The current day of the month can be indicated on the display scale 3 by a pointer 8, the pointer 8 being movably drivable by the watch mechanism of the watch or by means of a toothed wheel 9 along the display scale 3. The display scale 3 is arranged on a scale ring 2 which can be driven to move counter to the direction of movement of the pointer 8. <IMAGE>
