Abstract (en)
[origin: JPH01297003A] PURPOSE: To obtain a make-up set containing one-time amount used and provided with a distributor pre-filled with cosmetics by composing a package with two sheets partially welded with each other and forming a narrowing area between the feeder holder and distributor. CONSTITUTION: This tightly-sealed set 1 is formed by welding two plastic sheets 2a, 2b made from a polymer selected according to the cosmetic prescription. The plastic sheets 2a, 2b have chemical compatibility with the cosmetics contained in the distributor. They are welded by heat or ultrasonic wave. This make-up set 1 is formed into a rectangle in the plan view; consists of two parts 13, 14; the part 13 has the first not-welded area 13a and the second area where is joined mutually via the weld beads 6 that can easily to torn off by hands. The sheets 2a, 2b form a volume sectioned by each sidewall 4a, 4b of half-shell type. The volume 4 is made to have a finely smaller diameter in the narrowing area 7 than the minimum outside diameter of the brush bristles.
