Abstract (en)

[origin: EP0323361A1] Theft-proof furniture for precious objects, especially a fireproof safe, comprising a frame (12) and a drawer (2) mounted on this frame (12) by guide means (13), characterised in that it possesses non-motorised means for returning the drawer (2) from any open position towards a closed/unlocked position, in which the interior (15) of the drawer (2) is completely shut off and from which the drawer (2) can be pulled manually into the open position; motorised means for active locking/unlocking between the closed/unlocked position and a closed/locked position, which return the drawer (2) automatically to the closed/locked position; unlocking control means (17) which, when actuated in the closed/locked position, trigger the unlocking of the drawer (2) and its putting into the closed/unlocked position by the motorised locking/unlocking means.
