Abstract (en)

[origin: EP0323373A1] This assembly is noteworthy in that it comprises at least one module of several stackable containers (1, 2, 3, 4), of decreasing length, which are arranged in position with respect to one another so as to define, at least on one side, a homogeneous inclined plane, the said container module or modules being arranged on a pallet or gripping support (11), a protective cover (5) forming a rigid framework having a shape and volume ensuring that all the container module or modules are covered, and one or more lining means (6, 9) of a volume which complements the space remaining free after insertion of the protective cover around the container modules, the said one or more lining means having at least one panel (5-1) (9-1) (9-3) bearing firmly on the profiled front face (1-4, 2-4, 3-4, 4-4) in each container and ensuring total closure of said face. <IMAGE>
