Abstract (en)
[origin: WO8810303A1] Novel proteinaceous sweeteners are provided comprising an amino acid sequence based on the sequences of monellin subunits. The single protein may be prepared by recombinant techniques, to provide for a stable strong sweetening agent, which may be utilized in a wide variety of contexts.

Abstract (fr)
Nouveaux édulcorants protéiniques comprenant une séquence aminoacide basée sur les séquences de sous-unités de monelline. On peut préparer la protéine seule par des techniques recombinantes, pour obtenir un édulcorant stable et résistant pouvant être utilisé dans une grande variété de contextes.
