Abstract (en)
[origin: EP0323574A1] The U-shaped bent contact member (1) has insulation-perforating terminals on the ends of the side limbs for connection to incoming and outgoing connecting wires (2). Two contact springs (5) are torn off in the manner of fins from the base of the contact member (1) along its longitudinal edges, from the opposite direction, and are bent in the direction of the side limbs. The contact springs form a contact point for the connection of a protection plug. <IMAGE>
