Abstract (en)

[origin: EP0323643A2] A semiconductor integrated circuit having an input terminal (11) and a first circuit (13) responsive to a signal supplied to the input terminal (11). An input voltage limiting circuit (12) is further provided between the input terminal (11) and the first circuit (13). The input voltage limiting circuit (12) limits a voltage applied to the first circuit (13) to a predetermined voltage.
