Abstract (en)
[origin: EP0323781A1] The invention relates to outdoor, folding trunk-chair-type bench seating in which a panel forms either, in the open position, the back of the bench seating, or, in the closed position, the cover of the trunk. In the outdoor seating of the invention, the active locking position of the manoeuvring piece (5) limits the movement of the movable piece (2) regardless of the direction of the force exerted on its panels (2a, 2b). The seating comprises cushions which are integral with the back and seating parts, and, in the closed position, the link between the cover and the frame is watertight. <IMAGE>
