Abstract (en)  
[origin: US4892239A] PCT No. PCT/DE88/00317 Sec. 371 Date Jan. 23, 1989 Sec. 102(e) Date Jan. 23, 1989 PCT Filed May 28, 1988 PCT Pub. No. WO88/09637 PCT Pub. Date Dec. 15, 1988. The present invention relates to a device for making it easier to put on articles of clothing, such as coats, jackets or the like, with a holding device mounted so as to be of adjustable height on a vertical guide (1). The holding device has two half-hangers (3, 4) articulated by means of hinges (5, 6) with oblique axial directions (1, II). These half-hangers (3, 4) are tiltable forwards and obliquely downwards out of the horizontally aligned first end position into a second end position. Furthermore, a drive (7-10) actuable by the person putting on the particular article of clothing while he is putting it on is provided for varying the height h) of the holding device on the vertical guide (1). The device according to the invention affords in full and in the same way the assistance otherwise normally given by a helper in order to put on an article of clothing.
