Abstract (en)
[origin: EP0324084A2] The technical problem of creating a high-voltage transformer for television sets in which the connecting cables for the higher direct voltages are detachably attached in a simple manner is to be solved. This problem is solved by the fact that a sleeve, which contains means for attaching the cables and acts in conjunction with attaching means on the housing of insulating material is pushed onto the housing of insulating material of the high-voltage transformer. <IMAGE>
