Abstract (en)  
[origin: WO8802532A1] A system for exchanging and storing window-display posters (1-6) has two storage areas (11, 12) in which the posters are movably stored perpendicularly to their surfaces. Transport of the window-display posters between the storage zones is effected through two planes that border on the storage zones. At least one of the planes is arranged for displaying several posters. Conveyor means are provided for carrying the posters into and out of the planes, as well as for guiding the posters within the planes.
